

Side Event

Wednesday 2 October (12:00-14:00)
ROOM R9 – WING 2

Research on forests, trees and agroforestry: What's next? *Which priorities for the future?*

Given the incredible amount of new findings presented by thousands of scientists from so many organizations from all over the world gathered in Curitiba (Brazil), **What's next for forestry?**

The XXV IUFRO Congress brings together the latest from forest science. It is also inserted in a very dense international agenda: climate week NYC, COP25, heading to 2020 which will be a key year for the Rio Conventions, the start of a key decade for mankind and the planet.

FTA, the world's largest R4D program in the area of forests, trees and agroforestry, would like to take this opportunity to exchange, with all interested scientists attending the conference, views and perspectives on what needs to be prioritized for future forest research.

The side event will feature a thought provoking panel and a lively and open discussion, as well as space for networking with FTA scientists to envisage what's next for research.

Presenters from FTA

Amy Duchelle, CIFOR
Andrew Miccolis, ICRAF
Pablo Pacheco, WWF/CIFOR
Plinio Sist, CIRAD
Roger Villalobos, CATIE
Li Yanxia, INBAR

Moderator: Vincent Gitz, FTA Director

**The session is open
to all interested
parties**

The CGIAR Research Program on Forests, Trees and Agroforestry (FTA) is the world's largest research for development program to enhance the role of forests, trees and agroforestry in sustainable development and food security and to address climate change. CIFOR leads FTA in partnership with Bioversity International, CATIE, CIRAD, ICRAF, INBAR and TBI.
