side event!*

# Agroforestry - an agroecological pathway to SDG2

Welcome to an interactive multi-stakeholder discussion about opportunities and challenges to scale-up agroforestry.

*Refreshments  
will be served!*

## About this event:

The HLPE report on agroecology and other innovation has shown that agriculture and agricultural research must evolve towards systemic approaches embracing economic, social and environmental objectives. Agroforestry is one of these approaches and can deliver benefits at local and global level.

This side event will gather a multi-stakeholder panel to discuss, in the perspective of the HLPE report and the CFS recommendations, the opportunities, but also challenges to scale-up agroforestry. The event will explore in depth the implementation of agroecology and the Sustainable Development Goal 2 through the agroforestry pathway.

The event will include interactive exchange with the audience and live discussions.
