

FTA HIGHLIGHTS OF A DECADE

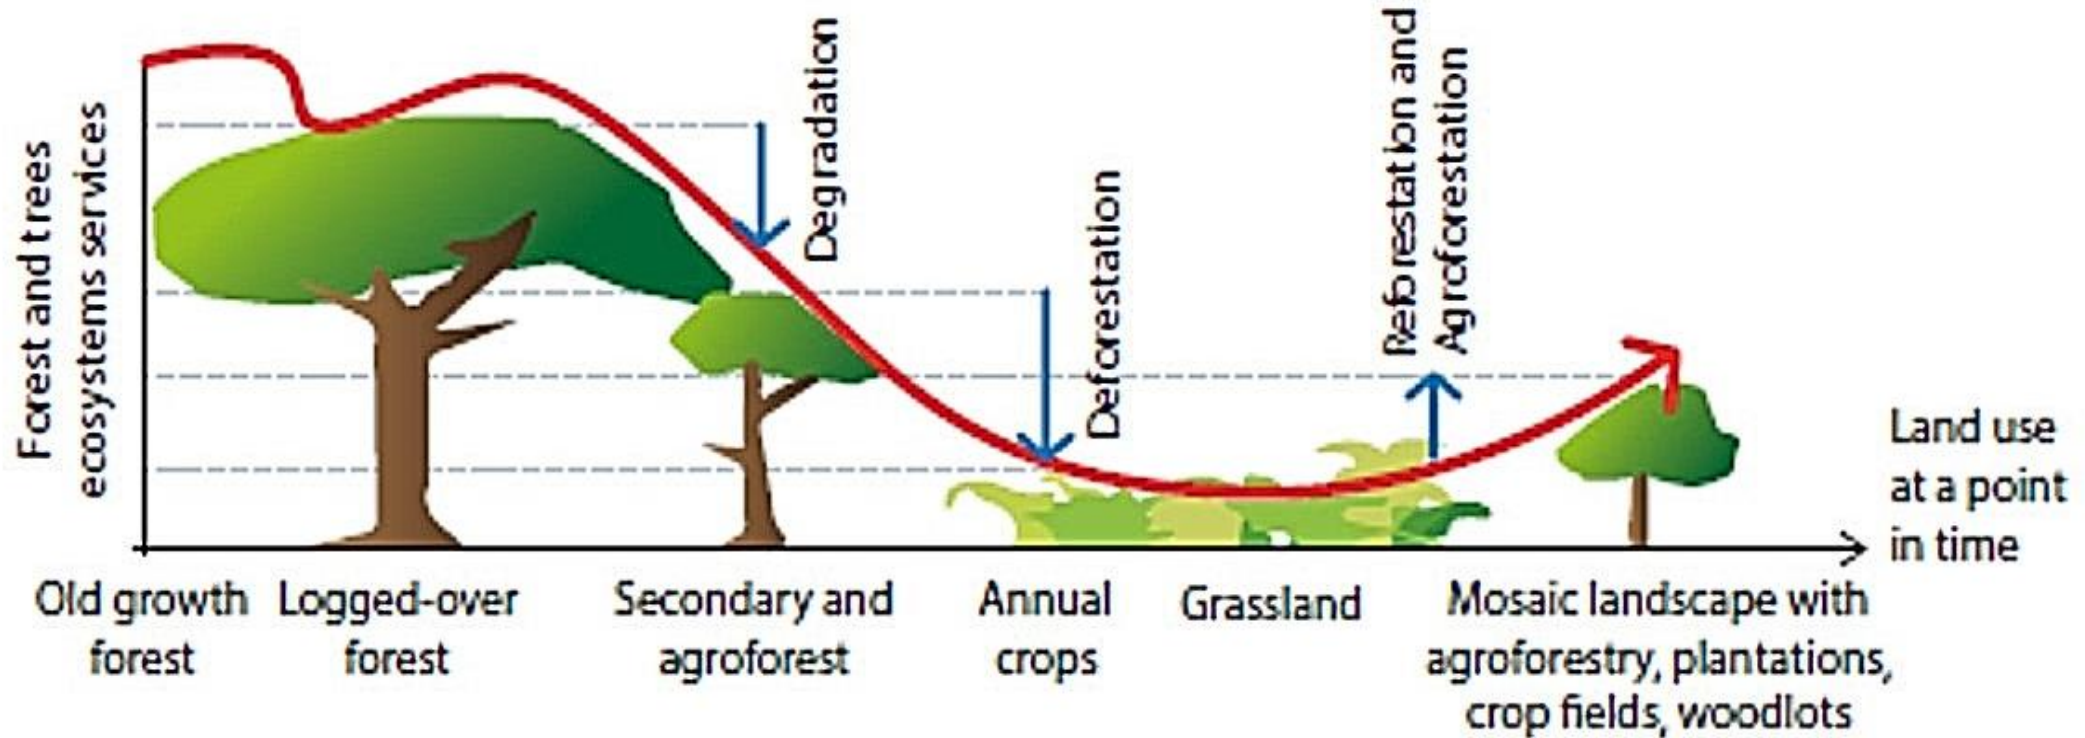

2011-2021

Forest and Landscape Restoration

FRIDAY 5
NOVEMBER
2021

Manuel R. Guariguata
Principal Scientist
CIFOR

Contributions to science

-
- State-of-the-art syntheses on tree/forest water interactions and teleconnections
 - Operationalizing links among climate change adaptation and mitigation in a FLR context
 - Land Degradation Surveillance Framework to diagnose land and soil health across landscapes

Contributions to global narratives and discourses

-
- Conceptual, monitoring and assessment frameworks, good practice principles
 - Guidance and scholarly syntheses on FLR and gender
 - Clarifying the “L” in FLR for enhanced design, implementation and monitoring

Contributions to policy and governance

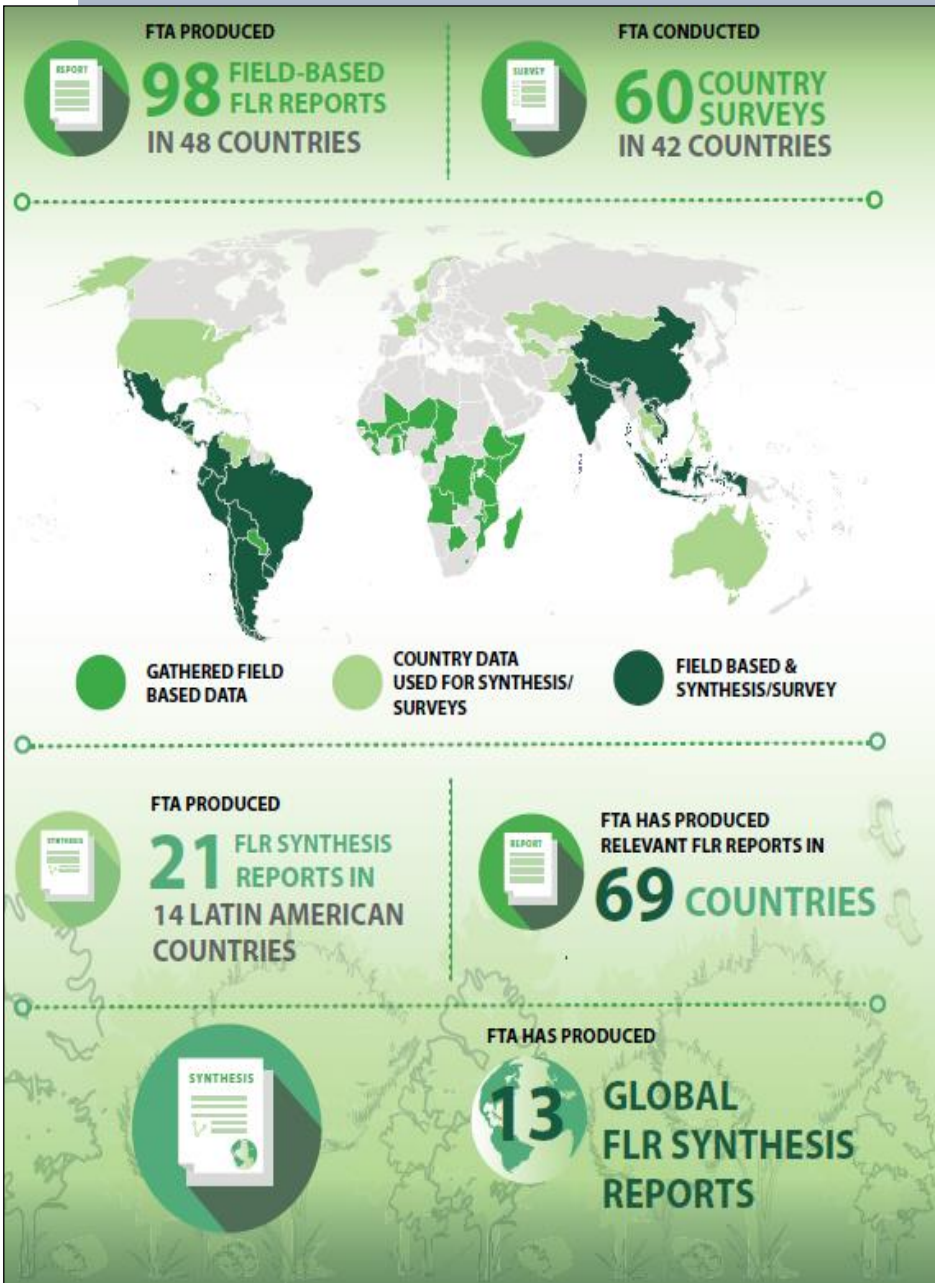

- Assessments on design and implementation gaps in FLR initiatives, national programs and projects
- Policy and legal levers to promote natural forest regrowth for multiple benefits
- Scholarly syntheses on FLR and governance

Focusing on actors on the ground

- Capacity needs assessments
- Multistakeholder dialogue frameworks for inter-sectoral and inter-institutional integration
- Participatory monitoring frameworks and citizen science approaches

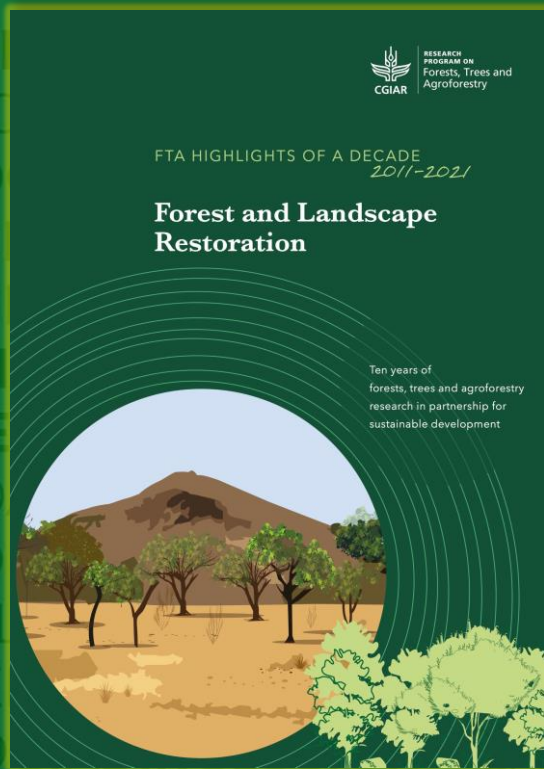

Contributions to national and international dialogues and commitments

FROM A DECADE OF RESEARCH
TO A DECADE OF IMPACTS

FTA HIGHLIGHTS OF A DECADE

2011-2021
